

QUOTES

EXAMPLE #4

# QUOTES

IN SPEECH OR WRITING  
YOU OFTEN QUOTE OTHERS,  
HTML HAS SPECIAL TAGS  
TO ENABLE THIS!

# QUOTES

YOU CAN USE "" DIRECTLY

```
<body>
<h3>
  Let's try without quotes:
</h3>
<p>
  Donald Trump's exact words were "You're fired"!
</p>
<h3>
  Now with:
</h3>
<p>
  Donald Trump's exact words were <q>You're fired</q>!
</p>
</body>
```

EVEN BETTER IS TO  
USE THE **<q>** TAG

THIS ADDS MEANING  
THAT THIS ELEMENT  
IS A QUOTE

# QUOTES

```
<body>
<h3>
  Let's try without quotes:
</h3>
```

```
<p>
  Donald Trump's exact words were "You're fired"!
</p>
```

```
<h3>
  Now with:
</h3>
```

```
<p>
  Donald Trump's exact words were <q>You're fired</q>!
</p>
</body>
```

THE BROWSER  
KNOWS HOW TO  
BEST DISPLAY QUOTES

YOU CAN STYLE THE  
QUOTES USING CSS  
IF IT'S AN ELEMENT

# QUOTES

## THESE ARE CALLED INLINE QUOTES

```
<body>
<h3>
  Let's try without quotes:
```

```
</h3>
<p>
  Donald Trump's exact words were "You're fired"!
```

```
</p>
<h3>
  Now with:
```

```
</h3>
<p>
  Donald Trump's exact words were <q>You're fired</q>!
```

```
</p>
</body>
```

**Let's try without quotes:**

Donald Trump's exact words were "You're fired"!

**Now with:**

Donald Trump's exact words were "You're fired"!

THEY FLOW WITH THE  
SENTENCE, IT'S NOT ON A  
DIFFERENT LINE OR  
INDENTED

# QUOTES

## WHAT IF YOU WANTED MULTI-LINE QUOTES? LIKE IN A POEM

<body>

<h3>

Some Robert Frost after Trump:

</h3>

"Two roads diverged in a wood, and I  
I took the one less traveled by,  
And that has made all the difference."

<h3>

That did not work so well did it?:

</h3>

<q>

Two roads diverged in a wood, and I  
I took the one less traveled by,  
And that has made all the difference.

</q>

</body>

Some Robert Frost after Trump:

"Two roads diverged in a wood, and I I took the one less traveled by, And that has made all the difference."

That did not work so well did it?:

" Two roads diverged in a wood, and I I took the one less traveled by, And that has made all the difference. "

THAT JUST PLACES  
EVERYTHING IN ONE LINE -  
IT'S NOT REALLY POEM-  
LIKE

THE <q> TAG DOES NOT HELP  
THE TEXT IS STILL INLINE

# QUOTES

## WHAT IF YOU WANTED MULTI-LINE QUOTES? LIKE IN A POEM

```
<body>
<h3>
  Let's try again
</h3>
  <blockquote>
    Two roads diverged in a wood, and I
    I took the one less traveled by,
    And that has made all the difference.
  </blockquote>
<h3>
  That was much better, but what we really want is this!
</h3>
<p>
  <blockquote>
    Two roads diverged in a wood, and I <br>
    I took the one less traveled by, <br>
    And that has made all the difference. <br>
  </blockquote>
</p>

</body>
```

# QUOTES

THE `<blockquote>` CREATES A  
SEPARATE BLOCK - ON A  
SEPARATE LINE AND WITH A  
DIFFERENT INDENT

```
<body>
<h3>
  Let's try again
</h3>
  <blockquote>
    Two roads diverged in a wood, and I
    I took the one less traveled by,
    And that has made all the difference.
  </blockquote>
<h3>
  That was much better, but what we really want is this!
</h3>
<p>  Let's try again
  <
    Two roads diverged in a wood, and I I took the one less traveled by, And that has made all the difference.

    And that has made all the difference. <br>
  </blockquote>
</p>

</body>
```

# QUOTES

THE `<blockquote>` CREATES A  
SEPARATE BLOCK - ON A  
SEPARATE LINE AND WITH A  
DIFFERENT INDENT

```
<body>  
<h3>Let's try again  
</h3>  
<blockquote>  
    Two roads diverged in a wood, and I  
    I took the one less traveled by,  
    And that has made all the difference.  
</blockquote>  
<h3>
```

```
</h  
<p>Let's try again
```

Two roads diverged in a wood, and I I took the one less traveled by, A

```
</p>
```

```
</body>
```

BUT THE LINES STILL ALL RUN  
TOGETHER? HOW DO I GET  
EACH LINE ACTUALLY SHOW  
UP IN A DIFFERENT LINE?

# QUOTES

BUT THE LINES STILL ALL **RUN  
TOGETHER?** HOW DO I GET  
EACH LINE ACTUALLY SHOW  
UP IN A DIFFERENT LINE?

GOOD QUESTION! WE'D  
MENTIONED EARLIER THAT  
**SPACES AND LINE BREAKS**  
MEAN NOTHING TO HTML

**<p>, <h1>** ETC ADD NEWLINES,  
BUT WHAT IF WE WANT  
ONLY A LINEBREAK?

# QUOTES

## WHAT IF YOU WANTED MULTI-LINE QUOTES? LIKE IN A POEM

```
<body>
<h3>
  Let's try again
</h3>
  <blockquote>
    Two roads diverged in a wood, and I
    I took the one less traveled by,
    And that has made all the difference.
  </blockquote>
<h3>
  That was much better, but what we really want is this!
</h3>
<p>
  <blockquote>
    Two roads diverged in a wood, and I <br>
    I took the one less traveled by, <br>
    And that has made all the difference. <br>
  </blockquote>
</p>

</body>
```

# QUOTES

**<br>** IS CALLED A VOID ELEMENT BECAUSE IT HAS NO CONTENT

**<br>** CAN BE USED WITHOUT THE CLOSING TAG. JUST **<br>** IS COMPLETELY VALID!

```
<body>
<h3>
  Let's try again
</h3>
```

**That was much better, but what we really want is this!**

```
<blockquote>
  Two roads di
  I took the c
  And that has
</blockquote>
```

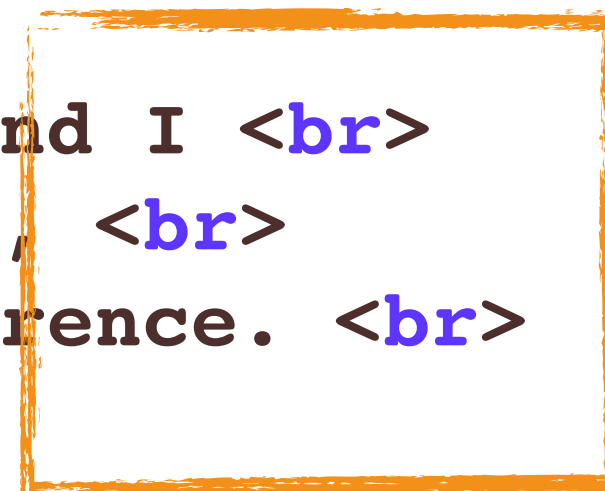

Two roads diverged in a wood, and I  
I took the one less traveled by,  
And that has made all the difference.

**<br/>** IS ALSO CORRECT AND IS A STRICTER FORM OF HTML AND WORKS WITH XHTML

```
<h3>
  That was much better, but what we really want is this!
</h3>
```

```
<blockquote>
  Two roads diverged in a wood, and I <br>
  I took the one less traveled by, <br>
  And that has made all the difference. <br>
</blockquote>
```

```
</body>
```

**<br>** IS USED TO ADD A LINEBREAK

# QUOTES

`<br>` IS CALLED A VOID  
ELEMENT BECAUSE IT  
HAS NO CONTENT

`<img>` IS ANOTHER  
EXAMPLE OF A VOID  
ELEMENT

```

```

```

```
